## **Hubbs Septic Service**

(315) 633-8030

### **SEPTIC SYSTEM LAYOUT**

If you do not have a sketch showing where your septic system is located on your property, locate them using a non-metallic soil probe and use the grid provided to show the location of your septic system components in relation to your house. Document any measurements for future location reference.

# PREVENTATIVE MAINTENANCE RECORD

Keeping a record of your septic system maintenance will help you anticipate when the next cleaning may be needed. Also, if you ever place your home on the market, this record could be beneficial to the sale of the home and handy for the new owners as well.
